EDMONTON, ALBERTA .- Alberta's Oldest Newspaper - WEDNESDAY, AUGUST 4, 1926

PRICE FIVE CENTS

Made In

We read that golf origin-ated in Holland. That may be why the ball is so fond of get-ting a player in Dutch.

Not in Alberta

A dry belt is a place where the farmer figures how many gallons to the acre his corr will produce.

Seems like folks are a long time thinking up somethin crazy enough to make th Charleston old-fashioned.

Conserve Alberta Prosperity

Share in it. Don't allow this profitable new industry to be financed abroad

A LBERTA, which already produces a fourth of Canada's grain crop, also supplies the greater part of Canada's petroleum production.

Alberta last year grew a twentieth of the world's wheat. Who can foretell how very soon she may be producing a twentieth of the world's petroleum?

For Geologists say that Alberta is on the eve of oil production unparalleled in history. Surely the future for this province as a producer of petroleum is promising.

Yet at the moment Alberta is paying out millions of dollars for gasoline and petroleum products and Canada's gasoline bill, paid to foreign refineries, reaches the staggering total of \$120,000,000.

And this with billions of dollars worth of the precious fluid awaiting but to be brought up from under Alberta's rocks! PETROLEUM production, in this age of oil, is acknowledged to be one of the most vitally important of all the industries. For petroleum today turns the wheels of the world, and its production in large and increasing quantities is imperative, not only to universal industrial progress but to the actual maintenance of present conditions.

And it has been shown in the case of the Standard Oil Co. that the refining and marketing side of this business is the most profitable, having to bear none of the risks of the exploration and development side.

It will thus be seen that with the imminent development of Alberta's tremendous oil resources, the Province's infant industry—the refining and distribution of her petroleum products—offers a most unusually favorable opportunity to the investor equipped with ordinary vision and enterprise. REFINERIES DISTRIBUTORS, LIMITED, now presents this unusual investment opportunity to the people of Alberta. Originally organized for the purpose of marketing the "Pep" petroleum products of the Alberta Refineries, Ltd., this company has enlarged its program to include the operation of a *cracking plant, by which 50 to 70 per cent of gasoline will be extracted from such crude as produced in the Wistonschik feld.

"cracking plant, by which 20 to 70 per cent of gasoline will be extracted from such crude as produced in the Wainwright field.

The details of the company and its operations are given elsewhere on this page. It is enough to note here that when the three refining units are in operation at capacity and the service stations are completed, a profit of 41 per cent is shown on the entire capitalization of the complete of the complet

Int of 41 per cent is shown on the entire capitalization of the company.

The present offering is a part of an allotment of Preference Shares at part—\$10, each share carrying a share of common stock as a bonus. These may be secured in units of one.

Edmonton people are particularly urged to participate in this most promising investment---while the opportunity is available

Cracking Plant For Treating Alberta Crude

Prof. Gustav Egioff of the Universal Oil Products Company Research Laboratories, in a lecture before the American Institute of Mining and Metallurgical Engineers, spoke emphatically upon the wonderful economy and value of the "Cracking Production of high grade anti-kneck Gasoline from crude oil.

He claimed, and showed by tests and actual production in many fields after the Dubbin shows a property of the Dubbin shows the property of the property of the property of the property of the production of the productin of the production of the production of the production of the pr

ties of this process."

'One of the wonder oil fields of the United States is the Smackover Arkansas, which is still producing 180,000 harrels per day, of which 180,000 harrels per day, of which 180,000 harrels (Deember 31,1925), is heavy oil. This oil, of asphaltic characteristics, is not very satisfactory as a fuel oil due to its coulding the control of the cont

"The general inquiry when a new Smack-over well was brought in 'What will they do with it after they get it?"

"One leading oil man stated that Smack-over 'Heavy crude' had verything in it it should not have for a refiner. Yet, despite these pessimistic statements. Smack-over heavy oil is being commercially cracked into over 50% gasoline. Smack-over heavy crude oil production of 162,000 barrels adily can be converted into 81,500 barrels of gasoline per day by the cracking process."

The results achieved presage those which will be accomplished by the Cracking Plant in treating the rude cil from the Wainwright field, as the chemical composition and gravity of the oils are almost identical.

the oils are almost identical.

"The Dubbs Process is so flexible that it converts any type of oil without change of principles or equipment into gasoline. Commercial plants of construction in various parts of the world, such as Japan. Borneo, Java, and Dutch West Indies, Australia, Rumaria, and many parts of the United States."

Refineries Distributors Limited

208 McLEOD BUILDING, EDMONTON, ALBERTA

Capitalization ~ \$1,000,000 90,000 Shares, Preferred, \$10 Par 100,000 " Common, \$1 "

Present Offering: The balance of a Block of 30,000 Preferred Shares at Par each Preferred Share carrying a Bonus of One Common Share.

DIRECTORS:

JOHN L. MERCER, Edmonton, Alberta, President.

H. A. STEWART, Vancouver B.C., Vice-President and Managing Director M. C. HAMMOND, Edmonton, Alberta. n, Ameria, Freidents.
J. C. C. BREMNER, Clover Bar, Alberta.
ROBERT McDONALD, Edmonton, Alberta.
W. A. TRIMBLE, Edmonton, Alberta, Secretary-Treasur

REFINERIES Distributors Ltd. was organized with a Dominion Charter, capitalized at \$1,000,000, divided into 90,000 8% Preference Shares with a par value of \$10.00 each; and 100,000 Common Shares with a par value of \$1.00 each. Paid up capital is \$200,000.

The company was organized to market the "PEP" products of the Albert Refineries Ltd., and also to produce gasoline and other products from crude petroleum by means of a cracking plant, this plant employing the Dubbs process, a great scientific and economic advance over the ordinary refining plant, extracting from 8 to 5 times as much gasoline from the crude oil.

The present issue, for the purpose of carrying on the immediate program of the company, is 30,000 Preference Shares, of which 10,000 shares have already been sold. The Preference Shares are offered in units of 1 at par \$10.00, and each of these Preference shares carries a bonus of 1 Common Share.

The initial program of the company is to erect and maintain a number of Service Stations throughout the Province for the marketing of "PEP" gasoline and petroleum products, a profit of 3e per gallon clear of

freight being available from this source alone at the present market prices.

Also to erect a *Cracking Plant at a cost of \$150,000. This will have a capacity of 1,000 bbls, of crude oil and will produce from this a minimum of 500 bbls, of anti-knock gasoline every twenty-four hours. At 35 galloms to the barrel, this shows a total output of 17,500 galloms a day.

Apart from the individual profit of the cracking plant unit working at capacity, the output marketed through the service stations shows a distributing profit of \$525.00 per day net. This alone will show a handsome divident on a \$1,000,000,000 capitalization in addition to the 8% per annum on the preferred shares.

Detailed figures will show this enterprise to be one of the very highest potentiality for profit. We shall be pleased to send a digest of the situation, based upon actual conditions, to the carnest investor.

In the meantime the soundness of the proposition will appeal to the investor who realizes that these pioneer enterprises in industry based directly upon natural resources, reap the rich reward.

ACT NOW

Marketing Company Has Contract with Refinery

(Refineries Distributors Ltd., the marketing company, have a contract from the refining company which guarantees the marketing company be per gallon clear of freight delivered at distributing points throughout the country. That is demoter tank wagen prices at these points. We pay our agents 125c commission and estimate a further 15c for office and overhead—leaving the per gallon clear profit to the marketing company.

As an example of the revenue to be derived from this source, figuring on the basis of 1000 barrels per day throughout, half of which would be fuel oil, leaving 500 barrels per day for distribution by the marketing company, 5003.55 equals 17,500 gals x 3c per gal. equals \$625.00 per day net profit or \$164,-325.00 net profit per year. This amount of oil can be distributed by ten bulk stations, and already we have more than this number established at a cost of \$100,000.

We have had to refuse many orders for products from other points, thus the need for expansion. In addition to this source of revenue the majority company will build a cracking plant that will give us an additional 17,500 gals per day of alreight gasoline, using Wainweight crude.

wright crude.

The Company is fortunate in having secured as General Superintendent of the plant, Mr. M. L. Berryman, formerly Chief Chemist and General Superintendent of some of the principal plants in the South such as the Gulf Refining Co., The Texas Company, Maxican Petroleum Co., and others. He was one of the first men is charge of a Crasting Plant many than the superintendent of the Crasting Plant many than the property of the Crasting Plant many than the property of the Crasting Plant many than the property of the Crasting plants communically to the very best advantage. He is a highly capable executive. He is meat optimistic regarding the present project.

TO THE REFINERIES DISTRIBUTORS LIMITED, 208 McLeod Building, Edmenton, Alberta.

Please furnish me with complete information regarding "Refineries Distributors Limited." It is understood that there is no obligation implied.

Name .	
Address	

"PEP" is the appropriate name given to the gasoline product of Alberta Refineries Limited, produced from the crude oil of the Wainwright field.

"PEP" has justified its name as a lively, volatile, anti-knock gasoline which motorists insist upon after once having used it. Today the present "PEP" plant is inadequate for the demand.

A S a convenience to you—that's why you'll find aix bottles of Bright's Concord always in the tidy sealed tight case. Look for the name "Bright's" Established 1874.

BEER

There is one big reason why everybody is demanding "LETHBRIDGE BEER" at clubs, hotels, canteens and in the homes, it is because our beer is "fully matured;" the public is quick to learn the distressing after effects of green beer, you just can't drink it and feel good. THE LETHBRIDGE BREWERIES spent over \$500,000 providing storage accommodation, so that all their products would be naturally and fully matured, that's why they are the only brewery in Western Canada that can guarantee full maturity, regardless of demand or season, and deliver the goods. Don't take any chances with half finished products.

THURSDAY'S SHOPPING NEWS.

Women's Gingham Dresses Bridge Lamps and Shades 95c

Truly exceptional value as the quality of gingham is splendid and the six different styles are quite smart, with their trimmings of contrasting shades and dainty belts; some have a smart collar adorning them. Square, round or "V" necks will be found, and or "V" necks will be found, and there is a large selection of clean looking colors from which to make your selection. The price is so low that it would certainly be an economy to procure several of these for future wear.

Sizes 16 to 42.
